

Specialists  
in steam.

Our company is focused on the delivery of ensuring the most efficient, and cost effective steam solutions for our customers.

Here at OPTIMISE we understand that the cost of insulation is high but the potential savings can deliver a rapid return on your investment.

## Optimise

**Optimise** can organise a survey to calculate standing losses from non-insulated commercial steam pipes. All that is required to establish a realistic evaluation is a simple site survey to identify the size of pipe and the steam pressure in use .

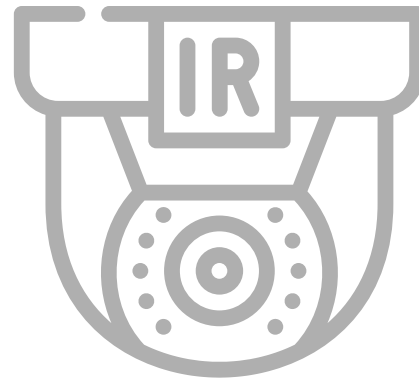

## Optimise

The survey is carried out using infrared cameras at all types of plant to identify "Energy Losses"

Once heat loss areas are discovered Optimise can then give your company an individual and effective way to reduce your energy consumption with immediate effect !

SPECIALISTS IN STEAM

## Optimise

Improving companies steam requirements.
